EXTRA LARGE GAMMA IRRADIATED CLEANROOM FACEMASKS WITH FOG PREVENTION

Product Overview

Our Extra Large Gamma Irradiated cleanroom facemasks with Tyvek® side extensions with Fog Prevention expand the coverage and prevent unwanted facial skin exposure.

These facemasks are made from an inner and outer facing of spunbonded polypropylene and a 100% meltblown polypropylene media layer.

Styles are available with either ties, or double elastic headbands.

Each facemask is packaged in a Chevron clean-peel Tyvek® pouch and is labeled with a lot number for traceability and an expiration date.

- Tyvek® Side extensions provide wider coverage area and an improved fit while also eliminating exposed skin
- Adhesive nose strip prevents fogging goggles from fogging
- Innovative Design prevents mask slippage which reduces contamination risks as well as the significant material and labor costs associated with regowning
- Prevents the common observations noted by inspectors during audits related to facial skin exposure inside the aseptic processing areas
- Aseptic operators are more effective and productive when they can see clearly and are comfortable

MATERIAL SPECIFICATIONS:

FACEMASK

PHYSICAL PROPERTIES

Material – Inner facing: soft cellulose material, white. Outer facing: spunbonded polypropylene, green. Media: 100% meltblown polypropylene. Aluminum nosepiece with nonallergenic adhesive strip. Latex free.

Bacterial Filtration Efficiency – at 3 microns	> 95	%
Particle Filtration Efficiency – at 0.1 micron	> 98	%
Length (+/- 1/2 in.)	12.25	in.
Width (+/- 1/8 in.)	4	in.

TOP/BOTTOM ELASTIC

PHYSICAL PROPERTIES

Material – White Latex free elastic

SIDE EXTENSIONS

PHYSICAL PROPERTIES

Material – TYVEK (Spunbonded Olefin) Type 1422A

Basis Weight	1.2	oz. / sq. yd
Thickness	5.3	mils
